

Information Security Training

The best defense is a good offense

It is clear that information security technology has advanced much faster than the number of people who have the knowledge to apply it. It is even clearer that with these advancements come more difficulties in keeping networks secure from intruders, viruses and other threats.

Did You Know...

- An insider attack against a large company could cause an average of \$2.7 million in damages, as reported by the Computer Security Institute and the FBI
- Unauthorized use of a company's computer systems are reported by 56% of companies.
- Companies experiencing theft of proprietary information lose an average of \$355,552 per year.
- Inside employees and outside attackers are equally to blame for attacks on computer systems.
- Only 28% of companies understand the value of security awareness.

The damage caused from these attacks have networks down for days impacting critical business processes – even preventing companies from communicating with their own employees. With the critical ability to detect and contain an attack as soon as possible, a network professional is better prepared to make the decisions about how to best protect corporate assets.

New Horizons Information Security Training will Prepare Staff to:

- Recognize and react quickly to internal and external attacks
- Decrease the downtime associated with security attacks
- Create and implement a plan for network security
- Develop a business continuity plan
- Reduce e-mail SPAM on the corporate network

Who will Benefit from Information Security Training?

Individuals involved in the design, implementation, management and maintenance of a secure network environment, including network administrators, server administrators, help desk technicians, PC technicians, IT managers, IS managers, and network engineers.

New Horizons Integrated Learning® Combines Multiple Learning Methods for More Effective Results

New Horizons will bring immediate value to your organization through our Integrated Learning approach, which encompasses more than just "taking a class." It's a complete method of training, reinforcing, supporting and validating learning through flexible delivery options including Classroom Learning, Online LIVE Learning, Online ANYTIME Learning, and Mentored Learning.

Our learning solution has the ability to assess the skills of individuals before and after class and provides post-class resources to increase knowledge retention, thereby offering a better return on your investment of time and money. Students have access to electronic courseware and Online ANYTIME tutorials, vLabs featuring hands-on experience with real equipment, practice exams, our online interactive technical reference library and more. And, don't forget, courses may be retaken for up to six months from the original class date, absolutely free.

New Horizons Provides a Total Training Solution

New Horizons offers a variety of courses and certifications that will create a well-balanced training program and can be bundled together as course training options. For example Project Management Business Productivity and New Horizons training for Cisco® are only a few. Certification exams are also available at the same location. Certification exams are also available at the same location.
