

Security+ Training and Certification

Protect your business from those who could destroy it

The theft or destruction of information or the disruption of communication resources can result in not only lost time and revenue, but also an irreparable loss of confidence by clients and customers. Professionals who have received Security+ training have demonstrated the ability to respond to human and organizational weaknesses, have had instruction in cryptography, communication security, use real-world tools, understand the infrastructure, and have earned the respect of the IT industry. If your IT professionals have at least two years of networking experience and possess a thorough knowledge of TCP/IP, Security+ is ideal for them.

New Horizons Security+ Training

Security+ training is designed to arm Information Technology professionals with the fundamental knowledge required to maintain the operational and organizational security of network devices and services. Security+ is a comprehensive offering that covers industry-wide security topics including hardening internal systems, identifying risks, responding to security incidents, and the use of security forensics after an attack. New Horizons Security+ offering further prepares IT professionals for enforcing organizational security through response policies, the use of proper documentation and education for end users.

What is Security+ Certification?

Security+ Certification is recognized around the world as the benchmark for foundation-level security professionals. Incorporating a comprehensive range of security knowledge areas, Security+ was developed with input from industry, government, academia and front-line practitioners. Security+ Certification certifies the competency of security professionals working in the IT industry.

Employers are Demanding Security+ Certification

- Combat hackers, attackers and security threats
- Maintain the integrity of your organization's communications, infrastructure and operations
- Protect corporate assets by eliminating security breaches
- Secure customer transactions and enhance customer satisfaction

The Importance of Certification

Professional Certification provides you with the knowledge, skills and hands-on experience required to successfully apply advanced technology and business practices in your job and increase your productivity and competitiveness.

New Horizons Integrated Learning® Combines Multiple Learning Methods for More Effective Results

New Horizons will bring immediate value to your organization through our Integrated Learning approach, which encompasses more than just "taking a class." It's a complete method of training, reinforcing, supporting and validating learning through flexible delivery options including Classroom Learning, Online LIVE Learning, Online ANYTIME Learning, and Mentored Learning.

Our learning solution has the ability to assess the skills of individuals before and after class and provides post-class resources to increase knowledge retention, thereby offering a better return on your investment of time and money. Students have access to electronic courseware and Online ANYTIME tutorials, vLabs featuring hands-on experience with real equipment, practice exams, our online interactive technical reference library and more. And, don't forget, courses may be retaken for up to six months from the original class date, absolutely free.

Learn from the Leader

With over 20 years experience, more than 250 training centers in over 50 countries and over 2,200 instructors, New Horizons is the world leader in computer training.
